

Lower Long Churn Cave

Legend

- Walking passage
- Crawl
- Stream
- Pooled water
- Large boulder
- Boulders
- Cobbles
- Formation
- Caution
- Current direction
- Entrance
- Trickle of water
- Drop/climb

Active streamway susceptible to flooding and becomes impassable in high water, fossil passage can then become active. Refuge is in chamber above Dolly Tubs. Be very vigilant with conditions in the local watershed, moorland gripping means run off and consequent flooding is very fast.
